

Trailer Mounted Hot Box Hire

These mobile units give the user the ability to perform permanent reinstatement works using materials not normally available in small quantities at night. They will keep hot asphalt up to spec for long periods, allowing the customer to use longer-lasting hot material for all types of road repair. The integral tipper gear allows for gravity discharge of material.

Specification:

- Heavy duty 3.5t gross chassis
- Insulated 2 tonne hopper with dual compartments giving the ability to carry two separate materials types.
- Ability to keep material in a usable state for up to 48hrs
- Tipping body mechanism powered by electric on board power pack. Check valves fitted to the ram
- Warning alarms on raising and lowering of the body
- Front Platform to allow easy opening of the hopper lids
- Hopper lids ram assisted
- Thermostatically controlled Diesel fired burner
- Led strobe beacons on rear and sides which can be operated from any vehicle
- Rear work lights
- Reflective chevron markings
- Built in battery charger with waterproof mains hook-up plug
- 12/24v led trailer lights
